DONGSHI

Listen - The sound of waves

Like plump fresh oysters

Dropping pearls in a jade dish

Like tidal creatures singing battle songs

Temple

Sightseeing spot

Dongshi Fisherman's Wharf Walkway Map

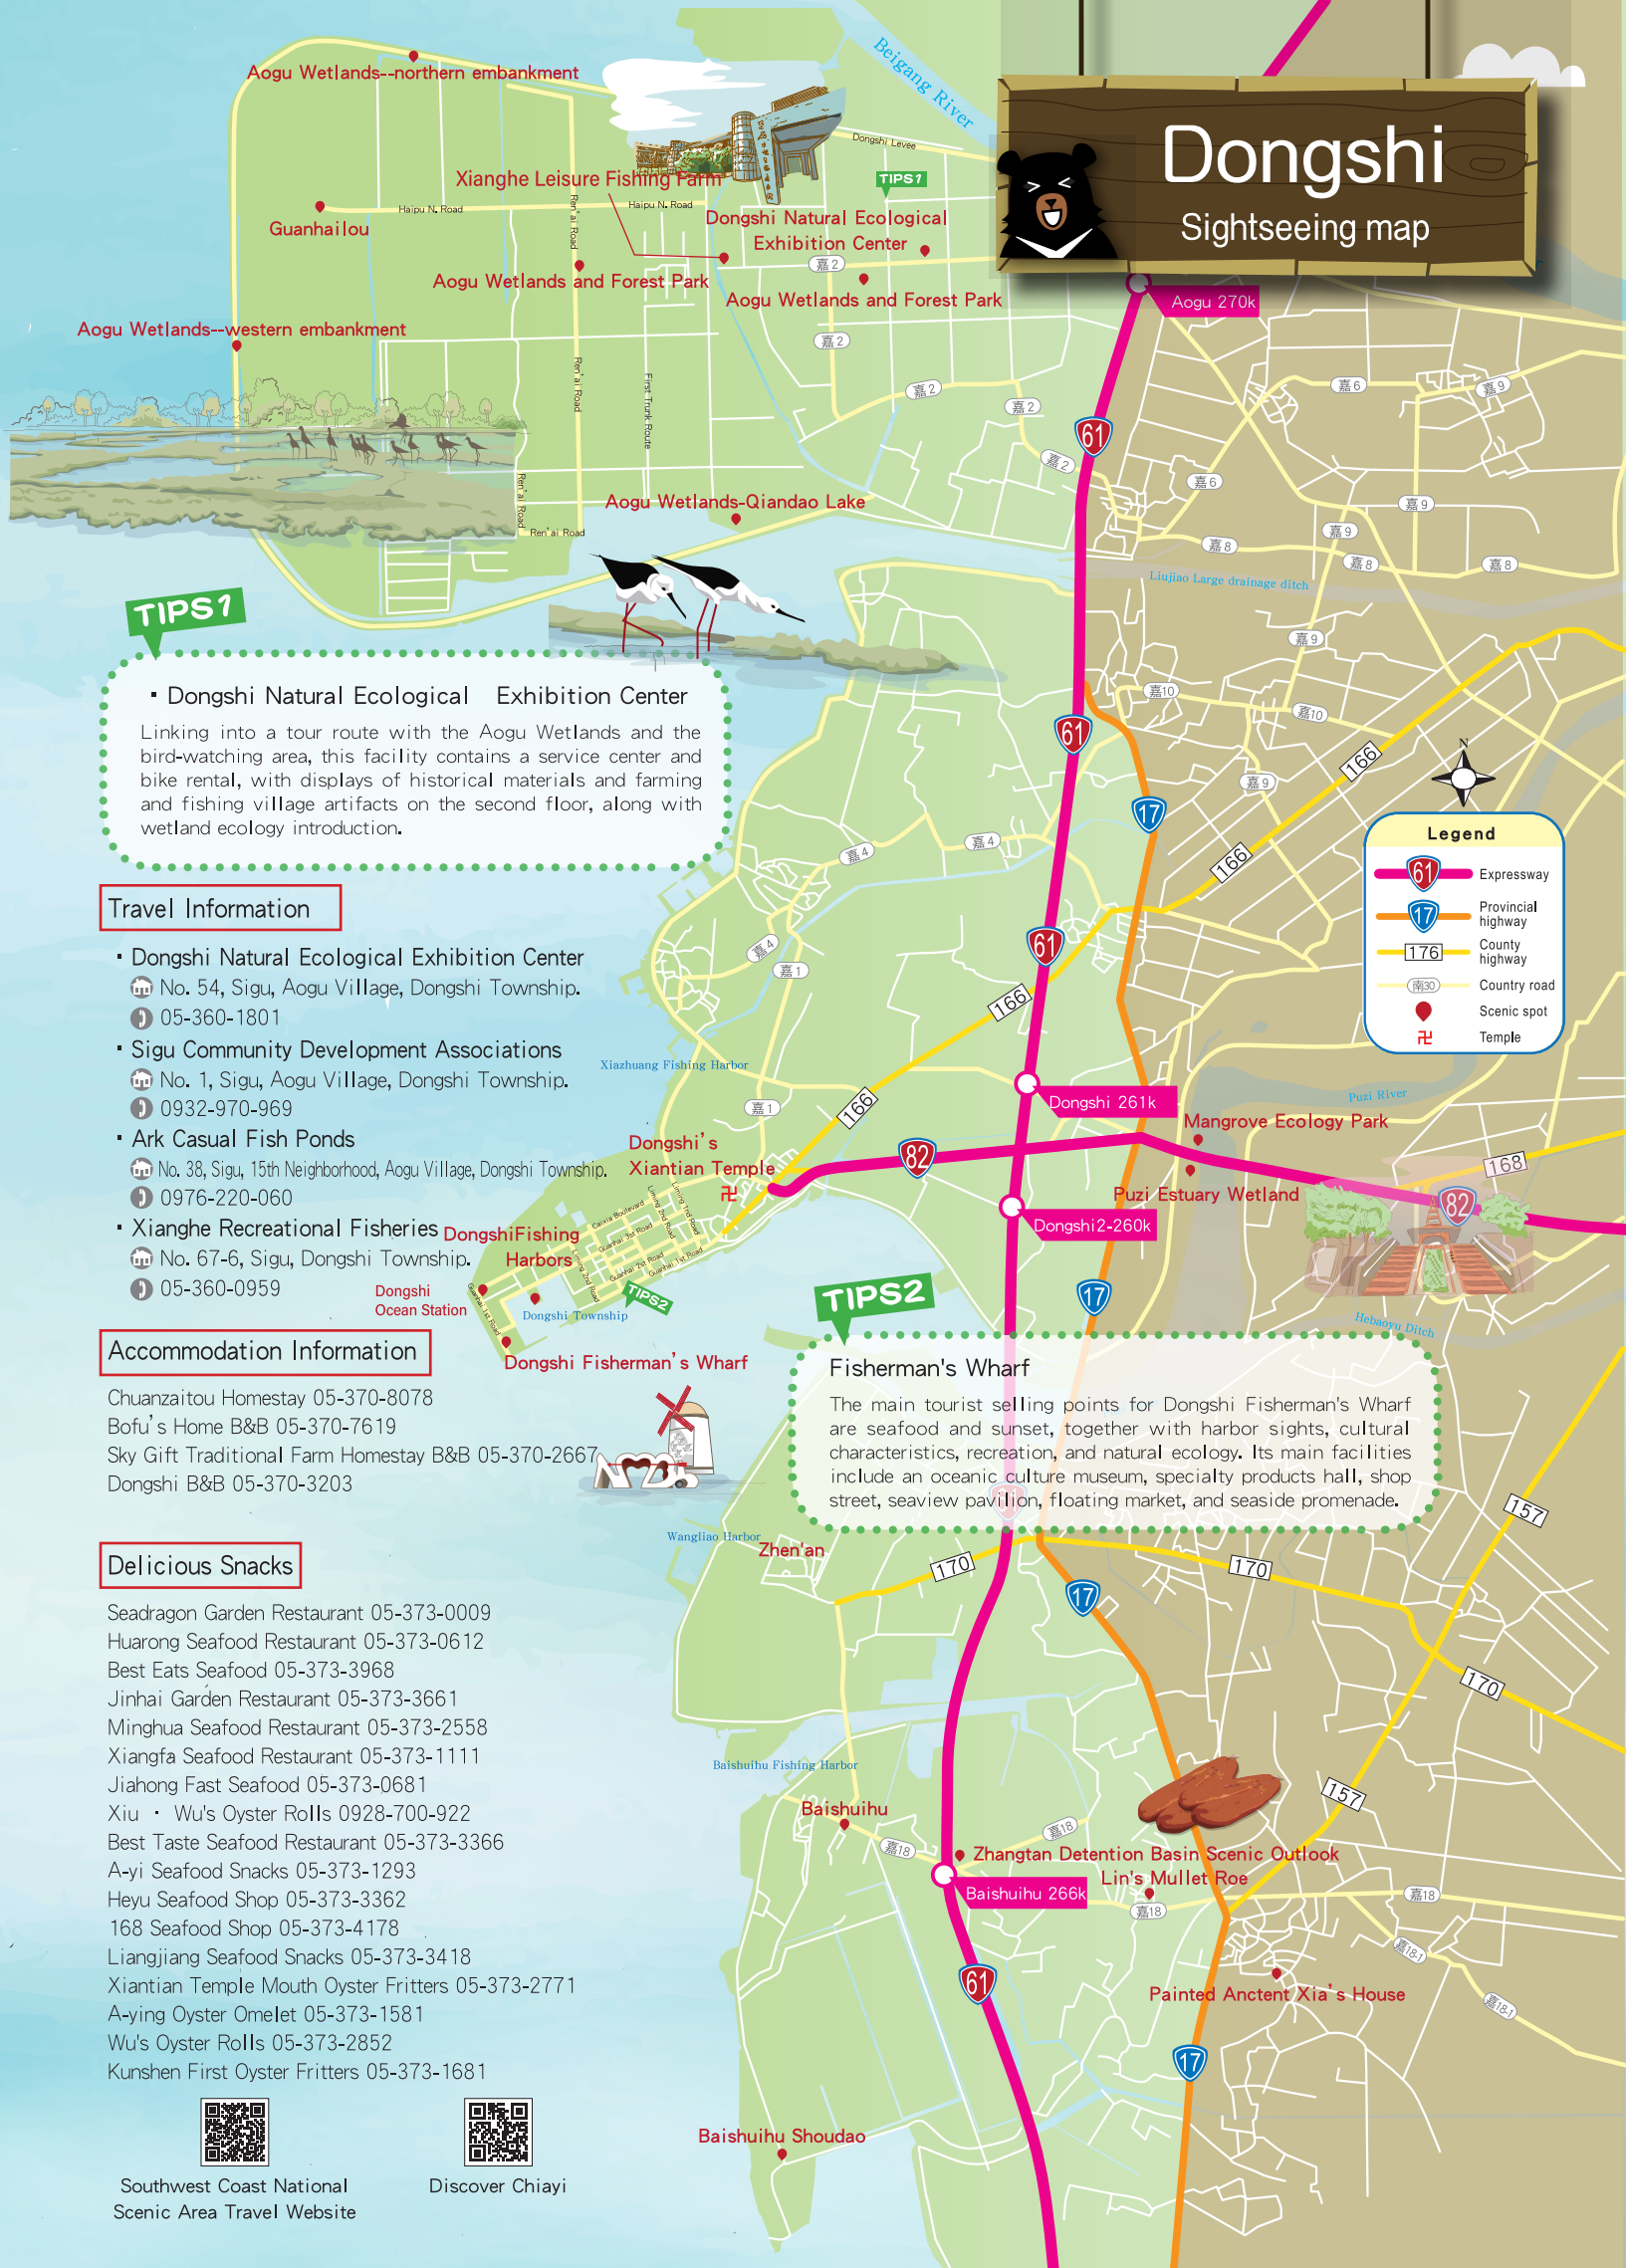

Xiantian Temple is over 300 years old and is dedicated to the Lord Protector of Life. During a restoration carried out during the Guangxu reign (1875-1908), the Five Kings (plague gods) were added to its deities. This impressive edifice faces the sea, and every five years it holds a boat-burning festival, its most important event. It has also held a lantern-riddle activity during the Lantern Festival for more than 100 years.

Dongshi Fisherman's Wharf is a recreation area, located on the north bank of the Puzi River estuary. It combines fishing-harbor scenery with local culture. It includes an oceanic culture museum, specialty products hall, shop street, sea-viewing pavilion, floating-bridge market, and seaside promenade. The wharf also has numerous items of installation art, and offers spectacular views of the sunset.

TIPS 1

• Dongshi Natural Ecological Exhibition Center

Linking into a tour route with the Aogu Wetlands and the bird-watching area, this facility contains a service center and bike rental, with displays of historical materials and farming and fishing village artifacts on the second floor, along with wetland ecology introduction.
